

S-QUAD

QUAD FIN SURFBOARD

DESCRIPTION

Kitesurfing has come full circle back to its surfing roots with the introduction of the S-Quad. Years of design experience has gone into making the perfect kite surfboard. The S-Quad has all of the design elements of a true surfboard with the construction to match the kind of abuse the surf will likely dish out.

Designed by Pete Cabrinha, the S-Quad blends his fast tow-surfing rockers with a wider curvier outline to deliver a board that powers off the bottom and snaps in the hook. The 4 fins allow the rail to hold when you need it and let it bust loose on demand.

The S-Quad is constructed with an X-48 EPS core and a composite skin. The x-48 construction has been custom developed to the Cabrinha S-quad. The XPS core is machined to offer the optimal shape. A full wood laminate under the feet provides strength and impact resistance. We use a multi weight glass lay-up to provide the best combination of strength and weight.

When ridden with the new Revolver HD surf kite, its as close as you'll get to the real thing. If you want just one board to handle a wide range of surf conditions the S-Quad is your board.

FEATURES

- > THIN RAIL PROFILE
- > TOW SURFING ROCKER
- > QUAD FIN DESIGN
- > X-48 CORE
- > COMPOSITE SKIN
- > WOOD REINFORCED HEELS
- > CUSTOM CUT TRACTION PADS
- > SURF STRAPS
- > FUTURE FIN SYSTEM

BOARD COMPONENTS

- > S-QUAD SURF BOARD
- > TWO 4" INCH (100mm) Front SURF FINS
- > TWO 3.25" INCH (83mm) Rear SURF FINS
- > SURF FOOTSTRAPS

SIZE

- 5'3" (160 cm)
- 5'9" (175 cm)

WAKESTYLE

FEATURES

- > WAKE-STYLE PERFORMANCE DESIGN
- > QUAD CONCAVE BOTTOM
- > WAKE BINDING COMPATIBLE
- > PVC CORE
- > HARD GLASS REINFORCEMENTS
- > 16/18/20 (WAKE) STANCE OPTIONS
- > PRECISION SHAPED RAIL

BOARD COMPONENTS

- > FOUR 2" INCH GFK FINS
- > WIDEBODY ADJUSTABLE FOOTSTRAPS
- > 3D FOOTPADS
- > GRAB HANDLE

SIZE

128cm X 38cm
133cm X 39cm
138cm X 42cm

DESCRIPTION

The all new Custom wake board breaks away from the pack with an entirely new approach to bottom design. The Custom sports a quad concave bottom and a new outline to deliver the ultimate combination of speed and drive. Developed and tested by Andre Phillip, the leader in the wakestyle movement, the Custom is dedicated to progressive wake style riding. The Custom can be ridden fin less when hitting sliders and still be able to throw down any trick in the book. Whether you are into flat water tricks or hitting obstacles, the Custom will allow you to push your riding to the limits.

The new improved construction now implements hard glass to increase strength and deliver a better flex pattern. The PVC core is precision milled and all materials are strategically placed to deliver the optimum weight, flex and rebound.

We've designed an entirely new component set to lower the weight and to raise the finish standard even higher. Our new 3D molded foot pad fits like a well worn shoe. The dual density EVA will cradle your foot from side to side and protect it from the impact of hard landings. The widebody adjustable foot strap is extremely simple to attach and easy to adjust to a perfect fit.

The Custom also comes standard with 4 high quality glass fins and a handle.

- > **FOUR 2" INCH GFK FINS**
- > **WIDEBODY ADJUSTABLE FOOTSTRAPS**
- > **3D FOOTPADS**
- > **GRAB HANDLE**

SIZE

123cm X 36cm
128cm X 37cm
133cm X 38cm
138cm X 39cm

DESCRIPTION

The Imperial continues to be the choice of riders who want to excel in all styles of riding. Since the Imperial lends itself to high speed riding through rough or choppy waters, we've added a concave bottom shape to help you get up to speed quicker. To handle the speeds even better, we've changed the outline slightly to increase the edge response and tracking. This has all been done while maintaining the forgiving feel and easy ride that it is well known for.

The new improved construction now implements hard glass to increase strength and deliver a better flex pattern. The PVC core is precision milled and all materials are strategically placed to deliver the optimum weight, flex and rebound.

We've designed an entirely new component set to lower the weight and to raise the finish standard even higher. Our new 3D molded foot pad fits like a well worn shoe. The dual density EVA will cradle your foot from side to side and protect it from the impact of hard landings. The widebody adjustable foot strap is extremely simple to attach and easy to adjust to a perfect fit.

The Imperial also comes standard with 4 high quality glass fins and grab handle.

148cm X 40cm
158cm X 41cm

BOARD COMPONENTS

- > FOUR 2" INCH (50mm) GFK WAKE FINS
- > WIDEBODY ADJUSTABLE FOOTSTRAPS
- > 3D FOOTPADS
- > GRAB HANDLE

DESCRIPTION

The Prodigy is the perfect first board as it will get a rider tracking upwind with it easy to control handling. From there it'll grow with you as you quickly progress through the stages. The reason for its easy handling and smooth feel lies in the combination of its wood core, fast rocker line, and forgiving outline. The wood core is responsible for its flex and dampening through the choppy water. The fast rocker will get a rider up on a plane quickly yet allow him or her to control their speed through the Prodigy's superior edge control.

Built to last, the combination of a wood core and biax glass present a unique blend of weight and durability. We've designed an entirely new component set to lower the weight and to raise the finish standard even higher. Our new 3D molded foot pad fits like a well worn shoe. The dual density EVA will cradle your foot from side to side and protect it from the impact of hard landings. The widebody adjustable foot strap is extremely simple to attach and easy to adjust to a perfect fit.

The Prodigy also comes standard with 4 high quality glass fins and a handle.
