

### FLYING HIGH

Winter season 2008/09 is knocking on rider's door, so it's time for a new foil kite, developed especially for ripping powder. The JN-kite Luis is a complete new concept of snowkite with an increased effective profile for better performance and faster turning speed. Equipped with a simple bridle construction and a sophisticated 4 line setup with reliable safety function the kite will satisfy all skills from rookies, doing their first free rides, to experts, doing freestyle moves or gliding steeply hillsides. With its small packing size, Luis is the perfect companion for hiking to lonesome powder beats. Although developed for snow kiting, this kite satisfies also on hard grounds like mountain board or buggy terrains.

## MAIN CHARACTERISTICS

- Effective profile shape for wide windrange and great performance
- Incredible turning and flying speed
- Effective depower
- Responding bar feedback
- Tight turning at loops
- Great upwind performance
- Long lasting hangtime for hill gliding
- Simple usage even for first trials and learning

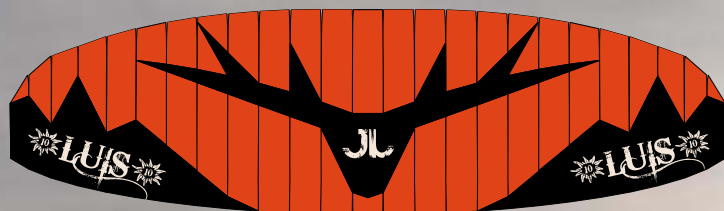

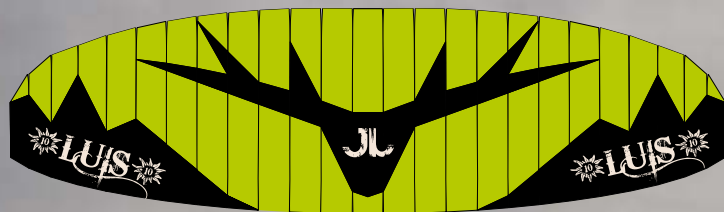

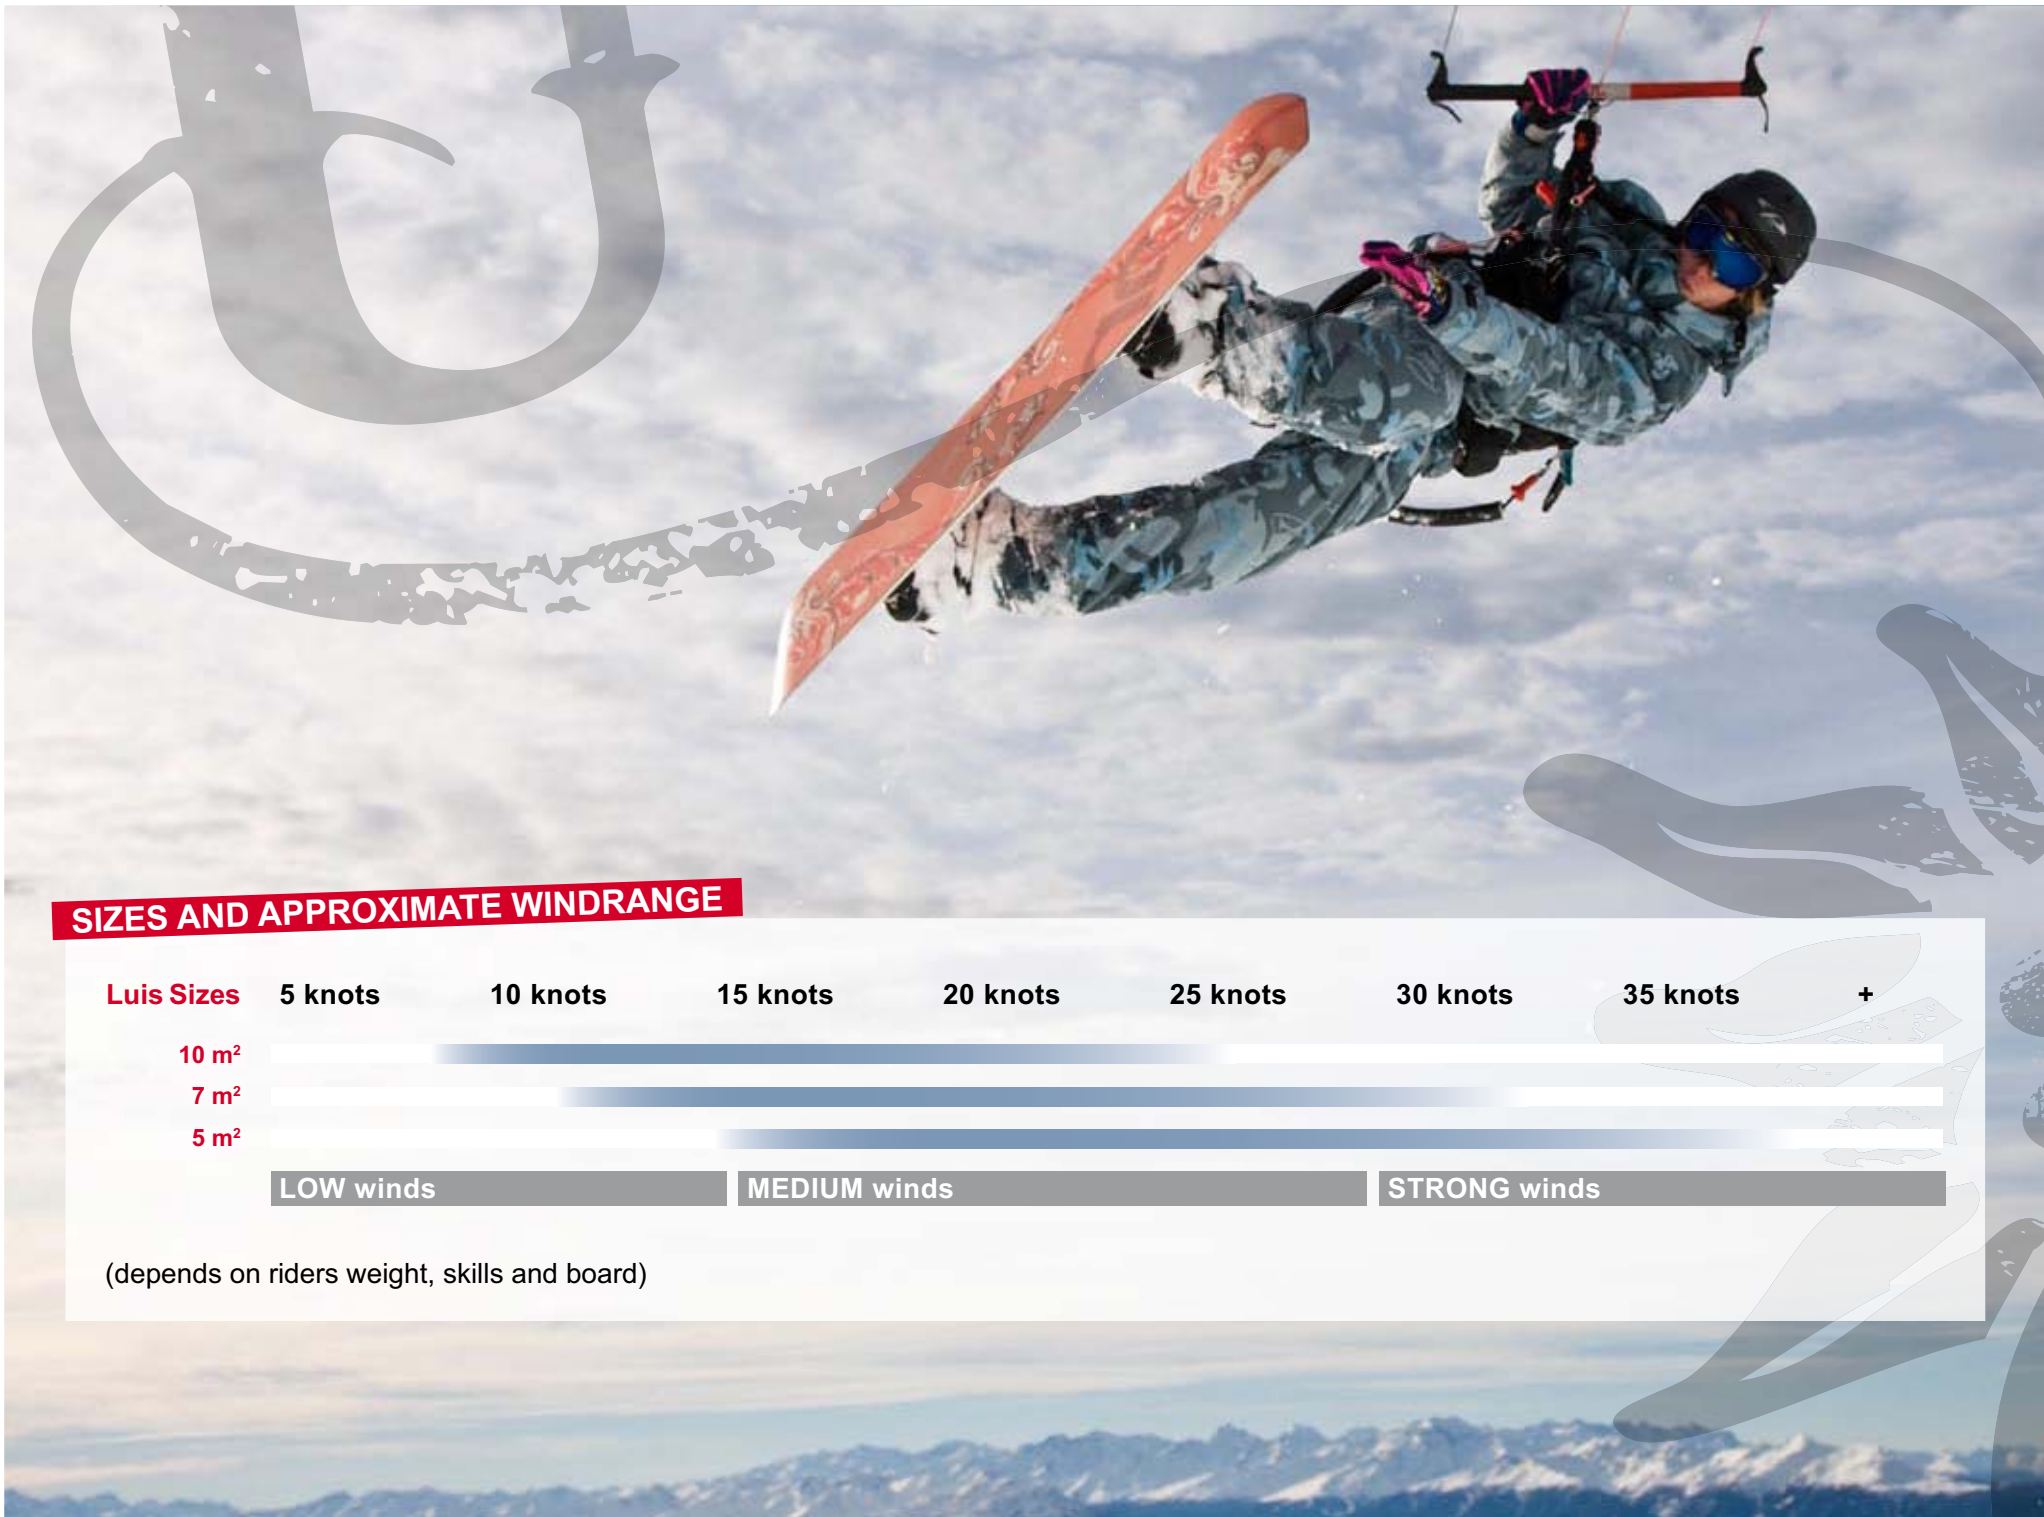

## MAIN FEATURES

- Extra light, high quality sail cloth for long durability
- Simple bridle construction
- Stitched in logo
- Backline Bridge for easy landing, safety and reverse launching
- Approved Quickrelease at bar setup
- Fast inflating ram-air chambers

AVAILABLE COLOURS

## SIZES AND APPROXIMATE WINDRANGE

Luis Sizes	5 knots	10 knots	15 knots	20 knots	25 knots	30 knots	35 knots	+
10 m <sup>2</sup>								
7 m <sup>2</sup>								
5 m <sup>2</sup>								
	LOW winds			MEDIUM winds			STRONG winds	

(depends on riders weight, skills and board)
