Progressive looks, simplicity and performance come together in the all-new 2007 North Vegas. The Vegas emerges as a dedicated 5 line freestyle kite with precise turning and steady handling for powered new school moves. Direct bar feedback allows you to feel exactly where the kite is for maximum control when unhooking and jumping. 2 Pump simplicity and inflatable wingtips get you on the water fast and packed up easy. Cam battens create an ultra-clean canopy entry and assist with the excellent de-power range. North's patented 5th Element system provides safety and re-launch.
